

# ALUMILINE™

*We don't rest until our good is better ...*

- *Designed for cost conscious customers*
- *New stroke size option*
- *Even better corrosion protection*

# ALUMILINE™

*Designed for cost conscious customers*

## DESIGN

- TSE tooled, tested and backed with confidence
- Steel spring housing with aluminum center section
- Meets SAE vibration test requirements
- Designed for cost conscious customers

## MAIN SPRING

- Corrosion protected standard performance main spring
- Designed and tested to meet performance requirements

## CORROSION PROTECTION

- TSE's in-house full immersion e-coating guarantees 100% coating for the best corrosion protection

## QUALITY LEVEL

- Center seal with double o-rings
- "Will fit" most applications
- Warranty supported by a U.S.A. company

## IN-HOUSE TESTING LAB

- Variable pressure
- Salt spray cycle
- Vibration
- Cold cell cycle
- Salt spray cycle
- Surry tank testing

## SIZE/STROKE

- 2-1/2" or 3" stroke

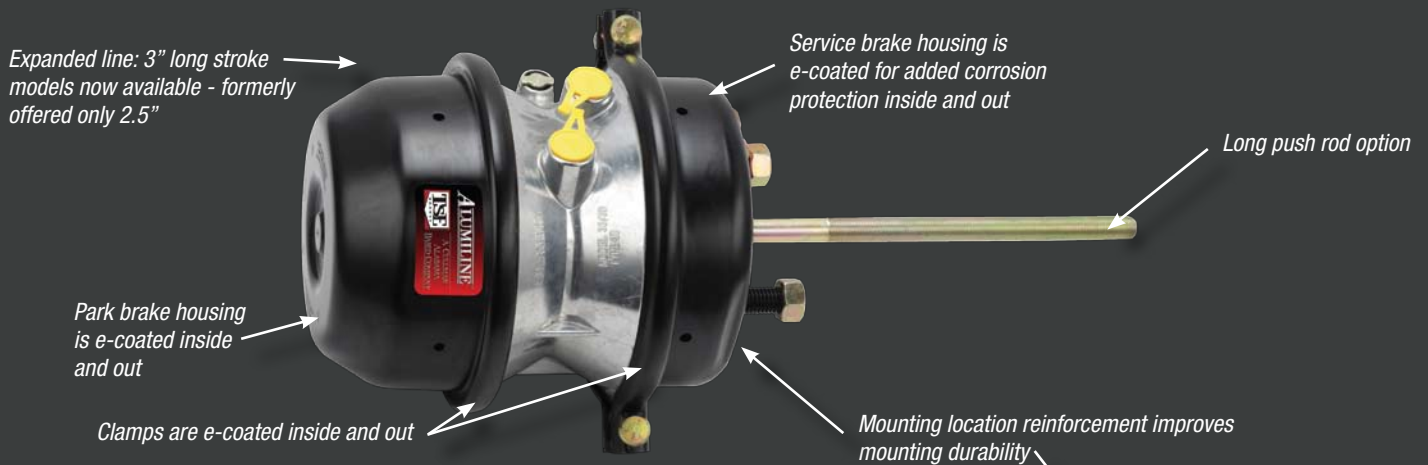

## OPTIONS

- Includes release tool and holder
- Tandem, piggyback and T30 service chamber
- Available with or without clevis
- Optional long rod for INTRAAX application
- Long push rod option

## WARRANTY
